National Declaration

The first phase of the movement for the creation of Pakistan was started in 1857 and accomplished in 1947, and the motives behind the movement were "what la elaha illallah means for Pakistan" and the second phase was for its implementation from 1947 to 2022. The narrative of the second phase movement was "The real freedom" complete autonomy from physical and mental slavery culminating and completing Pakistan. Those nations can never reap the fruits of complete freedom unless they have a narrative. We need to create such a narrative. That should reflect the aspirations of the nation, correctly guiding and representing the sentiments of the Pakistani nation, and it should be above all.

"We all Pakistanis pledge to fully protect Pakistan's geographical and ideological borders, the implementation of the Constitution, and freedom. It is the duty of every Pakistani and it is their first responsibility to retaliate against violators." Anyone who tries to conspire will fall into the category of treason and will be tried every day in an open court and will be called a traitor and deserve the death penalty. It will be widely publicized so that people know what treason is and what is its fate.

To promulgate correct and complete the omissions which were deliberately dropped in Articles 5 and 6 of the 1973 Constitution of Pakistan, It is very important to make the Pakistani crowd a nation.

Thanking you,

Engr. Arshad Naeem Chaudhry
